

HDT

Hochdruck-Dosier-Technik GmbH

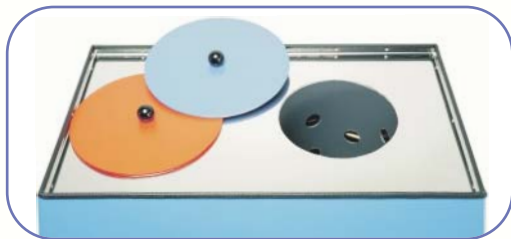

+40°C

-32°C

-45°C

HD F 32 / F 45

The HDT Freezer is equipped with very large cooling and heating tanks, particularly suitable for the fast freezing and thawing of the mixing units with mixed material. The reactivity of the materials is stopped in the cooling tank and subsequently it is reactivated in the heating tank. This enables you to interrupt production at any time.

Technical Data

Contents: refrigeration and heating tank 55 Litre each

Electric's 230 Volt/ 2,2KW

Temperature refrig. tank -45°C
heating tank +40°C

Measurements LxBxH 71 x 72 x 125 cm

Construction Mobile

Weight 160 kg

Advantages:

- No material loss
- Production without solvents
- No disposal problems
- Positive contribution to the protection of the environment
- HD F 32 for PU and PS
- HD F 45 for Silicon
