

LBH-25V

Automated Butyl Coating Machine for Spacer Frames

Butyl extruder for precision butyl coating on both sides of spacers. Sensor-controlled guide rollers ensure optimal stabilisation of the frame and thus enable even coating. Opening and closing of the coating nozzles for each frame side are controlled automatically. The integrated measurement device for frame widths ensures continuous nozzle adjustment from 6 to 24 mm. The coating speed can be set individually.

Highlights

- Continuously adjustable working height
- Processing of spacer frames with georgian bars / muntins
- Round arches and special shapes can be coated without any problem
- Frame widths up to 42 mm are possible

Technical data	LBH-25V
Profile width	6 - 24 (optional 24 -42)
Profile height	6 - 8,5 mm
Minimum size	120 x 120 mm
Transport height	540 - 940 mm variabel
Butyl nozzle	3 x 2,2 mm, 4,2 x 1,5 mm
Butyl supply	14 l Butylspeicher
